**SUBJECT:** *Phase 3 -- Merced River Salmon Habitat Enhancement: River Miles 42 to 43.5  
(Robinson Ranch and Gravel Mining Permit #307 sites) funding.*

Dear Ms. Darling,

Regarding the above project proposal, this letter is to inform you of the recent action taken by the Delta Pumps Fish Protection Agreement Advisory Committee (Four Pumps) at their scheduled July 1, 1998 meeting to obligate \$2,693,800 towards completion of the this project. Due to the deadline requirements of your May 1998 Proposal Solicitation Package, it was necessary to prepare the attached project proposal prior to our scheduled Four Pumps meeting and identify only funds which we were sure could be obligated as cost-share (\$540,000).

The recently obligated Four Pumps funds in combination with existing obligated DWR and DFG (Proposition-70) funds increases the total project cost-share to 53% (\$2,983,800). Should your Program decide favorably to fund this proposed project at the requested amount (\$2,443,759), it is our intent to request the remaining funds necessary (approximately \$250,000) from the USFWS Anadromous Fish Restoration Program FY 99 budget (due September 1998) along with any additional costs related to riparian or grazing easements which are being identified at this time.

We look forward to your consideration. If there are any questions, please contact either me or any of the Technical and Financial Contact people listed in the project proposal.

Sincerely,

Frederick A. Jurick  
Associate Fishery Biologist

cc: Dr. Perry Herrgesell, DFG  
Mr. Alan Baracco, DFG  
Mr. Steve Ford, DWR
